ABSTRACT Objective To explore the syndrome types and medication rules of lip cancer based on literature in Ming-Qing dynasties. **Methods** Chinese medical literature related to lip cancer in Ming-Qing dynasties were reviewed in library of Beijing University of Chinese Medicine. Syndrome, prescription and herb information of included literature was extracted. After unified standardized processing, database of Chinese medicine treating lip cancer was established. Frequency analysis was made on syndrome types, prescriptions, herbs and herbs' classification. **Results** Forty-two papers were included at last, with 14 syndrome types, 55 prescriptions, 167 herbs. Top 6 syndrome types of high frequency were syndrome of heat accumulation in spleen-stomach (15), syndrome of heat accumulation in heart-spleen (14), syndrome of wind-heat in spleen channel (13), syndrome of exuberance heat of liver fire (10), syndrome of exuberance of stomach fire (9) and syndrome of internal heat due to kidney deficiency (9). Among oral decoctions, top 6 prescriptions of high frequency were *Qingwei San* (清胃散, 10), *Chaihu Shugan San* (柴胡疏肝散, 9), *Ji Yin Di Huang Wan* (济阴地黄丸, 8), modified *Bawei Wan* (加减八味丸, 6), *Guipi Wan* (归脾丸, 5) and *Qingliang Ganlu Yin* (清凉甘露饮, 5). Among external prescriptions, top 3 of high frequency were *Huangbai San* (黄柏散, 12), *Baihui San* (白灰散, 5) and *Qingpi Shaohui Fang* (青皮烧灰方, 5). Among oral decoctions, top 3 herb types of high frequency were clearing heat herbs (19), replenishing deficiency herbs (18) and relieving superficies herbs (9). Among external prescriptions, top 4 herb types of high frequency were clearing heat herbs (17), activating blood & resolving stasis herbs (14), dispelling wind-damp herbs (12) and relieving superficies herbs (9). Top 6 single herbs of high frequency were *Gancao* [*Radix Glycyrrhizae*] (22), *Danggui* [*Radix Angelicae Sinensis*] (16), *Mudanpi* [*Cortex Moutan Radicis*] (10), *Huangqin* [*Radix Scutellariae*] (10), *Shudi-huang* [*Radix Rehmanniae Preparata*] (10) and *Fuling* [*Poria*] (10). **Conclusion** Main syndrome types of lip cancer were syndrome of heat accumulation in spleen-stomach, syndrome of heat accumulation in heart-spleen, syndrome of wind-heat in spleen channel, syndrome of exuberance heat of liver fire, syndrome of exuberance of stomach fire and syndrome of internal heat due to kidney deficiency. The treatment method was internal and external combination therapy. The internal therapy was combining clearing heat and replenishing deficiency, with relieving superficies. The external therapy was combining clearing heat, activating blood, dispelling wind-damp and relieving superficies. **Keywords** lip cancer; syndrome type; medication rule; literature research
